FBI-King Section 48 Serials 3901-3986, 90 docs, 197 pp. released

3918-9 FBI knew Ray could beat both McPen and King raps. Bureau warned all shut up about this.

In this range of serials there are a number relating to Judge Casey's ruling in St. louis and related matters in which there is extensive masking, attributed to 5 and 7. The 5 seems improbable and it is more likely embarrassment is rhe real reason. Inc 3932

3928 is an Atlanta serial withheld and referred to USPO (post office?)

Several sections deal with statemtns attributed to Edgar Eugene Bradley, made into separate file. Not relevant here if anywhere.

This section is still another proof that the FBI was getting nowhere.
